Build an agent from one sentence in Agents Office

You publish a blog post every week, but the social captions never get written. In Agents Office, Easy mode takes one sentence and Claude builds the rest of the agent.

WHAT THIS ADDS

Building an agent usually means filling in a long form: name, desk, instructions, schedule. That form is exactly why so many repetitive jobs never get automated. Easy mode takes the form away and puts one sentence in its place.

The problem it solves

Every week you write a post for your blog. The social captions for it never get written. Friday comes, you're tired, and the post goes unseen.

This example is just one scenario. Any repetitive job you forget every week looks the same.

Step 1: New agent

In Agents Office in Fynl.io, press New agent at the top. You get two ways in: Easy or All the details.

Step 2: Just one sentence

In Easy you write just one sentence. The one used in the video:

```
Every Friday at four, draft a caption for each of this week's posts, and never post anything.
```

A good sentence has three parts: when it runs, what it does, and what it must not do. "Never post anything" is the third one.

You can also leave the desk for Claude to pick.

Step 3: Let me check it first

Press Let me check it first. Claude fills in the agent form for you: the agent's name, the desk (in this example the SEO and Blog desk), the job step by step, and its schedule (Friday at four).

Step 4: Read it, then Create agent

Is what Claude wrote right? Press Create agent. From then on, the captions are ready every Friday. If something isn't right, change it right there before you build.

Easy or All the details?

If the job is simple and you can say it in one sentence, use Easy. If you want to set the name, desk, instructions and schedule one by one yourself, use All the details. Both build the same kind of agent; only the route differs.

What it costs

Agents Office is an add-on to either Fynl.io plan: **$19.99 a month** or **$200 a year**. The plans: Starter at **$49 a month** and Agency at **$149 a month**. New to the office? Start with the full Agents Office guide, then read hiring an agent.

DO THIS

Write one sentence that says when, what to do, and what not to do. Then press Let me check it first and read everything Claude wrote before you press Create agent.

What Fynl.io is

One portal a small business runs itself on, instead of five subscriptions that do not talk to each other.

- A CRM and pipeline that shows every lead and where it stopped
- A calendar clients can book straight into
- Quotes, contracts and invoices, with deposits taken up front
- A website and form builder, so the enquiry lands in the same place
- Your Gmail connected, so the whole thread sits on the contact
- Automations for the follow-up you keep forgetting to send

The AI runs on **your own Claude or ChatGPT API key** — no markup on it. No SMS or phone calls yet. $49/month per business, $149 Agency, and we move your contacts over for you.

Easy mode lives inside Agents Office in the Fynl.io portal, the same office your agents already work in, so there is no separate tool to build an agent.
