fynl.io

FREE GUIDE

Fynl.io your own AI key: the AI runs on your bill

In Fynl.io every tool marked AI runs on your own Claude or ChatGPT API key, on your own bill. Paste the key in Account and every AI tool switches on.

WHAT THIS ADDS

Whose AI is writing your emails, and whose bill is it on? In Fynl.io everything marked AI runs on your own key, and nobody else's key is ever used.

Everything marked AI runs on your key

Every tool in Fynl.io marked **AI** runs on your own **Claude or ChatGPT API key**. It lands on your bill, usually a few cents per task. Nobody else's key is ever used.

A chat subscription isn't an API key

A chat subscription and an API key are different things. You get the key from the **console**, set a **monthly limit**, and ten dollars is plenty to start.

Paste it in and test it

In **Account**, paste the key and press **Save and test**. Every AI tool switches on.

DO THIS

Get an API key from the console, set a monthly limit (ten dollars is plenty to start), paste it in Account and press Save and test. Every AI tool switches on.

What Fynl.io is

One portal a small business runs itself on, instead of five subscriptions that do not talk to each other.

- A CRM and pipeline that shows every lead and where it stopped
- A calendar clients can book straight into
- Quotes, contracts and invoices, with deposits taken up front
- A website and form builder, so the enquiry lands in the same place

- Your Gmail connected, so the whole thread sits on the contact
- Automations for the follow-up you keep forgetting to send

The AI runs on **your own Claude or ChatGPT API key** — no markup on it. No SMS or phone calls yet. $49/month per business, $149 Agency, and we move your contacts over for you.

You enter the key once in Account and every AI tool in the portal uses it, so the cost of the AI lands directly on your own bill.
