Fynl.io Email blasts: one email to your whole list

Stop emailing customers one at a time. Pick who gets it, pick a template, check the preview and send.

WHAT THIS ADDS

Emailing customers one at a time wastes hours. In Fynl.io, Email blasts sends one email to everyone or to a single tag, from a template or written by AI, and shows who opened it afterwards.

Pick who gets it

Send to **everyone**, or to **just one tag**.

Pick a template or write with AI

Start from a **template**, or press **Write with AI**. The **preview on the right** is exactly what lands in their inbox.

Test first, then it goes out gently

Send a test to yourself first. The blast then goes out gently, about **twenty an hour**.

See who opened it

Past blasts shows who opened each email, with a **Send again** button.

DO THIS

Open Email blasts, choose the audience, pick a template or press Write with AI, send a test to yourself, then send. Past blasts shows who opened it.

What Fynl.io is

One portal a small business runs itself on, instead of five subscriptions that do not talk to each other.

- A CRM and pipeline that shows every lead and where it stopped
- A calendar clients can book straight into

- Quotes, contracts and invoices, with deposits taken up front
- A website and form builder, so the enquiry lands in the same place
- Your Gmail connected, so the whole thread sits on the contact
- Automations for the follow-up you keep forgetting to send

The AI runs on **your own Claude or ChatGPT API key** — no markup on it. No SMS or phone calls yet. $49/month per business, $149 Agency, and we move your contacts over for you.

Email blasts lives in the same Fynl.io portal as your contacts and tags, and Write with AI runs on your own AI key.
