FREE GUIDE

# Fynl.io Forms: build a form, share it, read every answer

Stop collecting answers over text messages. Build the form, send one link, and get every answer in one table.

WHAT THIS ADDS

Answers collected over texts and DMs get lost. In Fynl.io, Forms starts from one of 38 templates or writes the form from a sentence, and every answer lands in a table you can search, sort and export.

## Start from a template or a sentence

Start a new form from one of **38 templates**, or **describe the form in a sentence** and the AI writes it, on your own key.

## Drag in the questions

Drag in questions: **ratings**, **file uploads**, even a **payment**.

## Share it three ways

Send the **link**, download the **QR code**, or put the form on **your website**.

## Read every answer in one table

Every answer lands in a table you can **search, sort and export**, with a summary of **who finished and where they stopped**.

DO THIS

Open Forms, start from a template or describe the form in a sentence, share the link or QR code, then read the answers in the results table.

## What Fynl.io is

One portal a small business runs itself on, instead of five subscriptions that do not talk to each other.

- A CRM and pipeline that shows every lead and where it stopped

- A calendar clients can book straight into
- Quotes, contracts and invoices, with deposits taken up front
- A website and form builder, so the enquiry lands in the same place
- Your Gmail connected, so the whole thread sits on the contact
- Automations for the follow-up you keep forgetting to send

The AI runs on **your own Claude or ChatGPT API key** — no markup on it. No SMS or phone calls yet. $49/month per business, $149 Agency, and we move your contacts over for you.

Forms lives in the same Fynl.io portal as Leads and Websites, and the describe-it option runs on your own AI key.
