Fynl.io Outreach: it finds your next customers

Tell it who you want in one sentence. It picks the audience, writes a three-email sequence and sets a safe daily limit. Nothing sends until you approve.

WHAT THIS ADDS

Repeat customers are not enough. In Fynl.io, Outreach takes one sentence about who you want, picks the audience, writes a three-email sequence and sets a safe daily limit, and nothing sends until you press Approve.

Say who you want in one sentence

Tell Outreach who you are after, for example **dental offices within twenty miles**. It picks the audience for you.

It writes the sequence and sets a safe limit

Outreach writes a **three-email sequence** and sets a **safe daily limit**, so you are not blasting strangers all at once.

Nothing sends until you approve

Nothing goes out until you press **Approve**. A **kill switch** stops everything instantly.

Your key, your mailbox

Outreach runs on **your own AI key** and **your own mailbox**, so every email comes from you.

DO THIS

Open Outreach, describe who you want in one sentence, check the audience and the three emails, then press Approve. The kill switch stops everything instantly.

What Fynl.io is

One portal a small business runs itself on, instead of five subscriptions that do not talk to each other.

- A CRM and pipeline that shows every lead and where it stopped
- A calendar clients can book straight into
- Quotes, contracts and invoices, with deposits taken up front
- A website and form builder, so the enquiry lands in the same place
- Your Gmail connected, so the whole thread sits on the contact
- Automations for the follow-up you keep forgetting to send

The AI runs on **your own Claude or ChatGPT API key** — no markup on it. No SMS or phone calls yet. $49/month per business, $149 Agency, and we move your contacts over for you.

Outreach lives in the same Fynl.io portal as your contacts. It runs on your own AI key and your own mailbox, so every email comes from you.
