FREE GUIDE

Fynl.io QR codes: a QR code you can change later

Make a QR code once, print it, and change where it goes any time. Every scan is counted, day by day, and trigger links do the same for plain links.

WHAT THIS ADDS

Printed a QR code, then needed to change the link? In Fynl.io a QR code points at a destination you can change later, so the sticker, flyer or card you already printed keeps working. It can open a link, a contact card, an email or a phone number, and every scan is counted.

Make a QR code in a few clicks

Press **New QR code**, give it a **name**, and choose **what it opens**: a **link**, a **contact card**, an **email** or a **phone number**. You can set the code colour and background and put a logo in the middle.

Print it once, change it any time

Download the code and print it once. Later, **edit where it goes** and the code you already printed keeps working. No new stickers, no new flyers.

Every scan is counted

Each QR code shows its **scan count**, day by day, so you can see which flyer, window sticker or table card actually gets used.

Trigger links do the same for plain links

Trigger links are the same idea for ordinary links: they **count clicks** and **tag the person who clicked**, so you know who was interested.

DO THIS

Open QR codes, press New QR code, give it a name and choose what it opens. Download it and print it once. When the offer changes, edit the destination instead of reprinting, and check the scan count day by day.

What Fynl.io is

One portal a small business runs itself on, instead of five subscriptions that do not talk to each other.

- A CRM and pipeline that shows every lead and where it stopped
- A calendar clients can book straight into
- Quotes, contracts and invoices, with deposits taken up front
- A website and form builder, so the enquiry lands in the same place
- Your Gmail connected, so the whole thread sits on the contact
- Automations for the follow-up you keep forgetting to send

The AI runs on **your own Claude or ChatGPT API key** — no markup on it. No SMS or phone calls yet. $49/month per business, $149 Agency, and we move your contacts over for you.

QR codes and trigger links live in the same portal as your contacts, email blasts and website, so a scan or a click leads straight into the rest of your follow-up instead of a separate tool.
