

Fynl.io Forms templates

With Forms in Fynl.io you don't start from scratch: pick a template, press Use, and change any question.

WHAT THIS ADDS

Most people build a form from a blank page and leave it half done. Fynl.io ships 38 ready-made templates, sorted into categories and searchable. Pick one, press Use, and the whole form opens with its questions, ready to edit. If no template fits, Write it with AI drafts a form from one sentence, using your own key.

Where Forms lives

In the Fynl.io portal sidebar, open **Forms & surveys** and start a new form. The **New form** page gives you three routes: **Write it with AI**, **+ Start blank** and **Start from a template**.

Pick a template

Under **Start from a template** there are 38 templates (**All 38**). Filter them with the chips along the top: *Lead capture, Contact us, Booking request, Quote request, Intake & onboarding, Feedback & NPS, Event registration, Order form, Job application, Waivers & consent, Survey and Quiz*.

Each card shows the form's name, a short description, its questions and how many there are. *Simple lead form*, for example, has five questions.

Search

Next to the heading is a **Search templates** box. Type *booking* and only the booking templates stay, such as *Book an appointment, Booking request (no calendar)* and *Free consultation*.

Use: the full form opens

Press **Use** on a card. The form opens in the builder with all its questions. Across the top are four tabs, **Build, Theme, Settings** and **Share**, plus **Edit / Preview** and a **Results** button. Changes save automatically (*All changes saved*).

The left column lists question types such as *Short answer, Long answer, Email, Phone, Number, Website / link, Address* and *Date*. Click any question and **Question settings** opens so you can change its choices, logic and more.

Book an appointment

The card for this template says it takes real times from your booking calendar and books them when the form is submitted. Its questions: name, email, phone, which service, a time slot and one extra question for details.

Write it with AI

If no template fits, press **Write it with AI**. As the page itself says, you need to connect your own Claude or ChatGPT key under **Account** → **AI** so it can write the form from a sentence. The AI runs on your key, not ours.

Start blank

Or press + **Start blank**: you enter a name and email and build the rest yourself.

DO THIS

Tonight, pick a template such as Simple lead form, press Use, and rewrite its last question in your own words.

What Fynl.io is

One portal a small business runs itself on, instead of five subscriptions that do not talk to each other.

- A CRM and pipeline that shows every lead and where it stopped
- A calendar clients can book straight into
- Quotes, contracts and invoices, with deposits taken up front
- A website and form builder, so the enquiry lands in the same place
- Your Gmail connected, so the whole thread sits on the contact
- Automations for the follow-up you keep forgetting to send

The AI runs on **your own Claude or ChatGPT API key** — no markup on it. No SMS or phone calls yet. \$49/month per business, \$149 Agency, and we move your contacts over for you.

Forms connect to your contacts, booking calendar and automations in the same Fynl.io portal, so a Book an appointment form takes the time from your own calendar.
