

Suno capped downloads — Studio is the way around it

Since 3 September Suno caps how many songs you can download: 7 ever on Free, 20 a month on Pro, 60 a month on Premier. Exports from Suno Studio are not capped, and Studio comes with Premier.

WHAT THIS ADDS

Most write-ups stop at the numbers. The useful part is the exception: Suno's own FAQ says Studio downloads are unlimited, so on Premier the cap is a limit on one route out of the app, not on your music. If you are buying download packs without having tried Studio, you are paying for something you already have.

What changed

On **3 September 2026** Suno started capping downloads. Before that, a Pro plan gave you credits and let you download everything you made.

- **Free** — up to 7 total *lifetime* trial downloads, personal and non-commercial only
- **Pro** (\$8/month) — 20 downloads per month, with commercial use rights
- **Premier** (\$24/month) — 60 downloads per month, with commercial use rights

The counts reset each month and unused downloads do not carry over. The cap is **backdated**: it applies to everything in your library, including songs made before 3 September. The songs stay playable and shareable either way — it is the download that is metered.

The way around it: Suno Studio

This is the part worth knowing. Suno's own FAQ says: *"users will still be able to download their work from Studio without limitation."*

Suno Studio is included with **Premier** — the plan page lists it as "Access to Suno Studio — now with MIDI, effects, automation, and design-your-own-plugins". So if you are already paying for Premier, the uncapped route is already yours.

1. Open **Studio** in the left sidebar.
2. Find the song under *Or start from one of your songs* and press **Edit in Studio**. Single-track uses the full mix and costs nothing; multi-track separates the stems and costs 50 credits.
3. Press **Export**, top right.

Ordinary downloads from your library still count against the monthly number. It is the Studio export that is not metered.

Two things that do not cost you a download

- **Re-downloading.** A song you have already unlocked can be downloaded again, in any supported format, without using another allocation.
- **Stems.** All the stems of one song count as that song's single download — not one each.

If you have run out

Your account page shows **Downloads Remaining** next to your credits, and a **Buy downloads** button beside it. Suno does sell additional downloads once you hit the cap.

Try Studio first. On Premier it costs nothing and does the same job.

DO THIS

Before you buy a download pack: open the song in Suno Studio and use Export there. On Premier that route is uncapped. Check your Downloads Remaining on the account page first so you know where you stand.

What Fynl.io is

One portal a small business runs itself on, instead of five subscriptions that do not talk to each other.

- A CRM and pipeline that shows every lead and where it stopped
- A calendar clients can book straight into
- Quotes, contracts and invoices, with deposits taken up front
- A website and form builder, so the enquiry lands in the same place
- Your Gmail connected, so the whole thread sits on the contact
- Automations for the follow-up you keep forgetting to send

The AI runs on **your own Claude or ChatGPT key** — no markup on it. No SMS or phone calls yet. \$49/month per business, \$149 Agency, and we move your contacts over for you.

A rule change you only notice when the button stops working is the same shape as a client follow-up nobody chased. Fynl.io keeps the enquiry, the quote and the reminder in one place, running on your own AI key.
